

## Visit to the NDCommerce Cross Border eCommerce Logistics Centre

Visit to the [NDCommerce](#) Cross Border eCommerce Logistics Centre ... great to see a fantastic and dedicated team working diligently for all our clients and principals.

Logistics is an essential part of eCommerce. More so for Cross Border eCommerce where brands from overseas need to have an importer of record in India and have their merchandise kept here.

ND Commerce provides international brands with an opportunity to enter the Indian market without having to invest heavily in the infrastructure and distribution set up.

ND Commerce has a full outsourced model whereby brands can outsource their entire ecommerce to ND Commerce, just like many international and domestic companies have been doing for many years.
